## Education

---

2023

### Software Engineering

Faculty of Computer Science & Engineering

2025-2026

### Frontend Development Academy

Brainster

## Skills

---

### Frontend

- React
- TypeScript
- JavaScript (ES6+)
- HTML5
- CSS3 / SCSS

### Tools

- Git
- GitHub
- REST APIs
- React Router
- Zustand
- NextJS
- Firebase

## Languages

---

English

Macedonian

## Frontend Developer

Frontend developer focused on building scalable and maintainable React applications. Experienced in state management, API integration, and modern JavaScript (ES6+).

## Profile

---

Frontend developer specializing in React and TypeScript with experience building scalable web applications. Skilled in REST API integration, state management, and modern JavaScript. Passionate about creating clean, maintainable, and performant user interfaces.

## Mentionalbe Projects

---

### Artist Marketplace Platform

Tech Stack: HTML5, CSS3, JavaScript (ES6+), REST API, Chart.js, Web Camera API

- Integrated external API to fetch and dynamically render artist data
- Implemented role-based functionality (Artist vs Guest access)
- Developed full CRUD operations for managing artworks
- Built filtering system for browsing and searching artworks
- Implemented auction state logic for publishing artworks to auction
- Integrated browser camera API to capture and upload artwork images
- Structured modular JavaScript logic with asynchronous data handling

### Restaurant Review Application

Tech Stack: React, TypeScript, Zustand, REST API (JSON Server), React Router

- Developed a dynamic restaurant listing application with client-side routing
- Implemented global state management using Zustand
- Integrated REST API (JSON Server) for data fetching and persistence
- Built functionality for adding/removing favorites
- Implemented POST requests for submitting user reviews
- Designed reusable components and modular folder structure
- Managed asynchronous operations with proper state updates

## Strengths

---

- Strong problem solving skills
- Experience building full React applications
- Clean and maintainable code practices
- Experience working with REST APIs
- Comfortable working with Git workflows

## Experience

---

**Brainster Academy** – Attending Brainster's Frontend Development Academy to strengthen my technical and practical programming skills.
